Sep – Nov 2024

- Contributed to both frontend and backend software development tasks.
- Applied programming skills to support the development and improvement of software solutions.
- Worked with other team members and gained practical experience with software development workflows.

IT Support Intern — National Health Insurance Scheme (NHIS) Office

Sep – Nov 2023

- Worked as part of the organisation's IT team to support day-to-day IT activities.
- Assisted in identifying and resolving general IT-related challenges.
- Helped support the smooth operation of the organisation's IT services.

TECHNICAL SKILLS

Web & Mobile Development	HTML5, CSS3, JavaScript, React.js, React Native
Backend Development	Node.js, Express.js, REST API development
Database	MySQL, SQL, database design and management, Git/Github
IT & General Computing	General IT support, software installation and configuration, computer troubleshooting

PROJECTS & DEVELOPMENT EXPERIENCE

Smart Attendance Management System
A web-based attendance management solution for educational institutions, developed using React.js, Node.js, Express.js and MySQL. Includes user authentication, role-based access, student and lecturer management, course/class management and attendance recording.

SkyVerge Hostels — Hostel Booking & Management Platform
An ongoing web and mobile platform concept designed to help students discover and book accommodation, while providing hostel administrators with tools to manage rooms and bookings. Technologies include React Native, React.js, Node.js and MySQL.

Restaurant Application
Developed a restaurant application as a software project, applying programming and application development skills to a restaurant-related use case.

Personal Portfolio Website
Designed and developed a personal portfolio website to present professional information, technical skills and software projects.

Nursing Training School Fees Payment Application
An ongoing application project intended to support the management of school-fee payment activities for a nursing training institution.

Investment Application — Client Project
Currently undertaking a client-commissioned investment application project. Development is in progress.

CORE PROFESSIONAL STRENGTHS

- Analytical thinking and problem-solving
- Ability to learn quickly and adapt to new technologies and working environments
- Teamwork and collaboration
- Communication and interpersonal skills
- Creativity, initiative and continuous learning
- Interest in applying technology to improve business and organisational processes

CAREER OBJECTIVE

To contribute to an organisation through practical IT support and software development, while continuing to strengthen my technical abilities and help deliver reliable, useful technology solutions.
